PERSONAL PROJECTS

SamHuB - Youtube Media Downloader (10/2021 - 10/2024)
- A web application for downloading YouTube videos and audio files. Built with Flask, the site allows users to easily obtain media content in various formats directly from YouTube links. (samhub.onrender.com)

HospitalAI Connect (Using RAG) (07/2024 - 07/2024)
- Developed **HospitalAI Connect** using Python, Django, and Groq API. It enables online OPD appointment booking and includes an AI chatbot with RAG technology for hospital information.

AI Voice Agent (04/2024 - 04/2024)
- Developed an AI Voice Agent Chatbot using HTML, CSS, and JavaScript for the frontend, and Python and Flask for the backend. This chatbot enables seamless voice interactions, supports multiple languages, and provides real-time responses. It is hosted on the internet at (voice-agent.onrender.com).

The city of dead 3D game (AI in metaverse) (06/2023 - 05/2024)
- Developed the City of Dead 3D game using the Unity game engine and C# scripting language. This is a zombie survival game where the player kills zombies attacking them and must find the antidote to save the lives of people in the city.

Guntha Measures Website (01/2024 - 01/2024)
- Developed the Guntha Measures website using HTML and CSS for the frontend and Python Django for the backend. This website measures land, farms, and plots in gunthas by inputting the length and breadth in feet. It is hosted on the internet at (guntha.onrender.com).
